SNOW AND ICE

CONTROL EQUIPMENT

# Meyer®

THE BEST BUILT,  
BEST BACKED PLOWS  
IN THE INDUSTRY.

## Plows that don't lie down on the job.

Introducing the Meyer Diamond Edge, **the tallest, most aggressive bottom-trip plow available.** The bold new design features an attack angle and precise curvature that delivers superior path clearing and snow-rolling action that moves more snow in less time.

Also available in full-trip under the Aggressor name, this design gives distributors stocking flexibility because Diamond Edges (bottom-trip) and Aggressors (full-trip) are readily compatible with Meyer's most popular mounting systems. **No more matching moldboards and mounts.**

And like all Meyer plows, these high rollers are built with Reliable Over Time Construction, the detailed things only we do that make Meyer plows more rugged and reliable.

**Meyer Diamond Edge  
bottom-trip moldboard.**

# Full-Trip or Bottom-Trip, EZ-Mount Xpress or EZ-Mount Plus, the choice is yours.

## A New Angle of Attack

With the Diamond Edge or Aggressor moldboards, you can move snow faster and throw it farther than any other plow on the market. A taller moldboard, more aggressive attack angle and precise curvature create superior snow rolling action, so you can move more snow in less time.

## Build The System That's Right For You

Now most Meyer plows are available in Diamond Edge (bottom-trip) or Aggressor (full-trip) to meet your specific needs. And regardless of your moldboard type, you can select the mounting system that best meets your needs.

**BOTTOM-TRIP** Only the lower portion of the plow gives way, while the rigid moldboard remains upright so the load is not lost.

## Aggressor®

**FULL-TRIP** When striking an obstruction, the entire moldboard flips forward on the Meyer Full-Trip moldboards to provide the highest degree of protection from hidden road obstructions.

## Choose Your Mounting System.

Simply drive up and the EZ-Mount® Xpress™ automatically centers and locks the plow in as little as 11 seconds. That's it, you are ready to plow. No pins, no holes, no twisting, no turning, NO HASSLES! There is nothing faster!

For people that use their vehicle for personal and professional use, the EZ-Mount® Plus™ is the perfect answer to quick changes. The moldboard and lift frame assembly store as one unit, leaving your truck with a clean and neat appearance. Simply disconnect one power plug, pull two pins, back up and you're on your way.

## BEST BUILT, BEST BACKED PLOWS IN THE INDUSTRY.

**2 YEARS** standard on all components. \*Register new plow systems online at [www.meyerproducts.com](http://www.meyerproducts.com) to activate years 3 through 5. Available Fall 2006.  
**3 YEARS** on all components.\*
